# What is an Arts Award ?

Arts Awards are a range of qualifications that young people aged up to 25 can take part in which will help them to learn more about the arts and artists and take part in creative activities.

For each award you must collect information about what you have learnt. This can be done in lots of different ways - through writing, drawing, making something, photos...

When you have completed your work you will need to share what you have learnt. this can be with a friend, a teacher, your family or a group. you can share your log book with them and tell them all about your discoveries!

For each completed arts award you will get an official certificate, accredited by Trinity College London
